New POS Store & Forward Release

The newly released POS Store & Forward package provides advanced sales detail reporting and is designed to take advantage of broadband networking to send and receive sales data. The program archives sales detail and provides graphical reporting of item quantities sold at different price levels over selected time periods, by store, by region, by month, week, quarter, year, and day of week. Visit <http://www.cooken.com/POSStoreAndForward.htm> to view a sample report, download the manual, or download the tutorial.

Barrington Software Incorporated Joins Retail Broadband Alliance

Barrington Software is pleased to announce that it has joined the Retail Broadband Alliance, a forum sponsored by New Edge Networks, that makes it easy for businesses migrating to broadband networks to increase revenue, cut expenses, and improve customer experience. “The Retail Broadband Alliance provides businesses with solutions, not just raw network capacity,” said George Kotcher, President and CEO of Barrington Software.

About New Edge Networks

New Edge Networks builds and manages broadband networks for businesses and communications carriers. Through its nationwide network of more than 850 switches and Internet routers, New Edge Networks uses various broadband access technologies for building business networks. These include all types of DSL, Frame Relay, ATM, cable modems, and Satellite. Its network coverage reaches 100 percent of U. S. business addresses. New Edge Networks’ product suite of managed WAN and VPN services received Frost & Sullivan’s Telecommunications Services 2005 Product of the Year Award. New Edge Networks is on the 2005 lists of the 500 fastest growing companies compiled by Deloitte & Touche and *Inc.* magazine. The company’s Web site is www.newedgenetworks.com.
