## **BSI Cater Customers Are Happy**

### **Collegiate Catering:**

*"BSI Cater is our catering department's most valuable tool. With almost 5000 events entered, ranging from small intimate gatherings to large events for as many as 2000 people, we can move at a fast pace to access, in just a few seconds, information on any specific event for any customer.*

*The ability to duplicate specific sections of an existing event to create a new event is extremely powerful and a real time saver. With the comprehensive set of reports in BSI Cater, we have everything we need to satisfy our customers as well as the production, facilities-setup, and accounting departments. BSI Cater provides the best of both worlds by allowing us to set up standard service items that we use over and over and still create ad-hoc items on the fly while booking the event live with our customers."* Bob Love, Collegiate Catering, Springfield, MO, a contract food management organization, - [www.collegiate-catering.com](http://www.collegiate-catering.com).

### **Lakeland Regional Medical Center:**

*"We were looking for a cost effective, flexible catering event software package that could be configured to accommodate how we do business and provide great customer support. Barrington Software's BSI Cater has exceeded our expectations in all areas."* John Biswanger, Lakeland Regional Medical Center, Lakeland, FL, a 900 bed regional medical facility - [www.lrmc.com/site](http://www.lrmc.com/site)

Through the end of 2006, Barrington Software is offering a **special price of \$1399.95** for the [Catering Package](#) that includes the CookenPro Suite, BSI Cater, and BSI Accounting Bridge. The package also includes 1-year of email and phone support/maintenance, software updates, and 2 hours of online training. Check out the [new 3.03 features](#).

### **Did You Know?**

BSI Cater is integrated with Barrington Software's back-office system, CookenPro, for Recipe and Menu management, inventory control, purchasing and receiving. Recipes can be imported in to BSI Cater as service items and assigned to an event.
