

## **October 2005 Barrington Software Newsletter**

### **Ross School Implements CookenPro**

Over the past few months, Ross School has implemented a network enabled CookenPro for back office management of meal preparation and inventory control. Barrington Software converted the legacy vendor's database and provided training for the staff. The 470 students, faculty and staff are served breakfast and lunch daily. Beth Collins, Executive Chef, says: *"this makes my life much easier."*

Ross School, [www.ross.org](http://www.ross.org), a private school for grades four through twelve, is located in East Hampton, New York. The school's mission is: *"to change the way education meets the future; to foster interdisciplinary, integrated thinking and innovative leadership; to engage fully in the global community; and to facilitate lifelong learning."*

### **New Reports Available In CookenPro**

The new 3.17 release of CookenPro features an array of new reports including Inventory History reports that track everything that has happened to an inventory item, including importing, reconciliations, purchasing, transferring, adjusting, sales and requisitions. The reports are available by Cost Center, Shelf, Day, Week, Month, Quarter, or Year. Go to [www.cooken.com/UpdateCommercial.htm](http://www.cooken.com/UpdateCommercial.htm) to read about all the new reports and other new features.
