### **New CookenPro 5.0 Includes USDA Recipes**

Barrington Software is including the USDA Recipes for Schools with the new 5.0 Version of the software. This set of quantity recipes includes recipes from the 1988 *Quantity Recipes for School Food Service* and the 1995 *Tool Kit for Healthy School Meals*. Per USDA documentation, the recipes “were tested, evaluated, revised, standardized, edited, where needed, and consolidated. These updated recipes reflect changes made in the newest edition of the *Food Buying Guide for Child Nutrition Programs*. The recipe ingredients were also updated to include healthier alternatives, such as lower fat ingredients, wherever possible. Revised recipes were also updated with Critical Control Point (CCP) information from the 2003 FDA Food Code supplement.”

You can view the 196 recipes at [This USDA Page](#). Current users can request the recipes after updating to the 5.0 software release. You can read about other enhancements in the 5.0 at [www.cooken.com/UpdateCommercial.htm](http://www.cooken.com/UpdateCommercial.htm).

### **Commercial Food Systems Provides Nutritional Product Information**

Thank-you to [Commercial Food Systems](#) of Indianapolis, IN. They have provided Barrington Software with nutritional information for their food products. Users of CookenPro can import all of the items and recipes created from the items. The recipes will be ready to add to a menu for Nutrient Standard Menu Planning (NSMP). For more information about Commercial Food Systems, you can call Dan Irish at 317-926-4237

For more information about CookenPro, contact [info@barringtonsoftware.com](mailto:info@barringtonsoftware.com) or call 877-487-7020.

### **Did You Know?**

Local nutrition items, recipes, and complete menus entered can be exported and shared with other users?
