***Wesley Palms Implements CookenPro***

[Wesley Palms](#), a beautiful San Diego retirement community established in 1962, is in the process of implementing [CookenPro](#). Wesley Palms provides a fine dining experience for residents, offering three healthful meals each day with a sandwich and salad bar and meal plans to suit each resident's dietary needs. Dan Ordons, DDS, and Executive Chef Geoffrey as well as the rest of the staff at Wesley Palms will use CookenPro for recipe and menu planning, nutritional analysis, inventory control, purchasing and receiving.

***POS Store & Forward for TEC R4 is Released***

[POS Store & Forward](#) now supports the R4 version of the TEC FS3700 terminal as well as the previous R2.53 for the FS2700, FS3600, and FS3700 Terminals and Datasym COMM2000. The R4 version has a new, easy setup for data transfer from the register to a PC.

The new POS Store & Forward release sends employee in/out times from the register to [Labor & Scheduling](#). The in/out times are stored and used to create a payroll. The payroll can be exported in a variety of formats, including a [Heartland Payment Systems](#) format.

**Did You Know?**

Labor & Scheduling can import text files from 3<sup>rd</sup> party time clocks and a biometric devices. Barrington Software will help you set this feature up.
